

Hifz Tip:

Sometimes we all forget certain things, it's normal.

But one of the most powerful habits for strong Hifz is to know the structure of what you're memorising.

Know the basics of each Juz:

- Number of pages
- Surah names
- Where each 1/4, 1/2, 3/4, and full section begins and ends
- Even small details like how many Ruku's are in each Juz and how they start

It might feel tough at the beginning, but soon it becomes part of your daily routine.

Don't move to the next 1/4 or next Juz until the previous one is solid, meaning you can recite it confidently without mistakes and you know its basic structure.

This method builds strong Hifz, in sha' Allah.
