

Hifz Tip: Mastering Mutashābihāt

Struggling with Mutashābihāt (similar verses) can make memorisation challenging. Here is a simple method that will stay with you for life

Simple Method:

When you come across a similar āyah in another Juzz, write the Juzz number next to it

For example, if you are reading an āyah in Juzz 17 and it also appears in Juzz 14, write 14 next to it.

Then go to Juzz 14 and write 17 by the similar āyah there.

How It Helps

This small step helps your brain make connections naturally. You have only written a number, but your mind does the rest, linking the verses and strengthening your memory over time.
